ADC (MCP9303) Demo

rev 1.00.000

#### 1. Overview

The goal of this ADC demo is to provide a starting point to work with the MCP9303 ADC available on the Creative Development Board using a Mi-V softcore system.

Some features of the Creative board are included in this design: UART, user LEDs, pushbuttons and the MCP93x3 interface. On the RISC-V side: Interrupts (External IRQs), MCP93x3 drivers, GPIO and UART configuration and management and access to different memory devices.

### 2. Description
